\$2.00 a Year; 5c a Copy

A freak windstorm that lasted only a few seconds Monday evening severely damaged the wind-charger on Charlie Cave's farm.

Two carloads of Carbon Legion members motored to Drumheller Tuesday night to attend a Drumheller Legion meeting at which the Provincial President and the Dominion Vice-President were speakers.

by the Postal Department  
at Ottawa

Mrs. Harry Hunt, Editor  
George Wheeler, Publisher

Subscription \$2.00 Per Year  
in Canada or the Commonwealth  
—\$3.00 per year in United States.

Mrs. Sarah Cadman is visiting in the district for awhile.

Mr. and Mrs. Garrett spent the weekend at Banff.

John Mucha has accepted a position with the P. & H. Grain Co. at Dunphy.

Mr. Tom Sugden spent a few hours in town on Monday meeting old friends.

Ed Martin has purchased a farm 18 miles west of Acme and his address will be Carstairs.

Mrs. Chris Zeigler is a patient in the Drumheller hospital having undergone a recent operation.

Mr. Jack Appleyard spent the past week at Banff taking a special school course sponsored by the A.T.A.

Mrs. A. Hedstrom is a patient in the Hushlewood nursing home with a broken hip. We wish her a speedy recovery.

We regret having been so late publishing this issue of The Chronicle. Our typesetting machine has been giving us trouble and was out of operation for a couple of weeks.

Miss Neva White and Miss Lilla Dick of Carmangay recently graduated from the Galt hospital, Lethbridge, have accepted positions in the Junior Red Cross hospital at Calgary.

To Mr. and Mrs. Erland Zeigler, Friday, August 15th, twin girls in an Edmonton hospital.

**ANDERSON—POFFENROTH**  
Mr. and Mrs. Fred Poffenroth announce the engagement of their daughter, Edna Elaine to Mr. Mervin A. Anderson, son of Mr. and Mrs. Elmer C. Anderson of Brooks. The wedding will take place September 20th in Mount Calvary Lutheran Church.

## POPE LEASE

Honoring Miss Phyllis Edwards, bride-elect of this month, Mrs. E.B. Andrew and Mrs. H. H. Crowell were joint hostesses at a shower in the Andrew home. Those present were Mesdames O. Pallesen, F. Poxon, J. Peterson, J. Bacon, E. Grenier, H. Church, G. Walker, L. Murray, W. Crawley, A. DeBoer, J. Loewen, A. McKinnon, J. Edwards, W. Edwards, L. Andrew, J. Sears, P. Klem, Miss Y. Andrew and Miss C. Tunnbridge. Gifts were sent by Mrs. A. Church, Mrs. A. Everett, Mrs. K. Rowbottom, Mrs. R. Rowbottom and Mrs. H. Currie. Games were played and the gifts were presented in a gaily decorated trailer wheeled in by Miss C. Tunnbridge dressed as an oil man.

Miss Frances Hardy of the Dominion Seed Laboratory, Calgary visited at the Andrew home this weekend.

The Misses Gladys and Muriel Crowell, Shirley Edwards and Hugh McKinnon spent the weekend at their homes.

## FAR EAST BOUND

To the Canadian Pacific Steamships' 10,000 ton cargo vessel Maplecove goes the honor of being the first company ship to return to Pacific service since World War II. The ship, which sailed from Montreal recently, is headed for Vancouver, where she will take on the balance of her cargo. The route for the new

service will be between Tacoma, Seattle, Vancouver, Yokohama, Kobe, Manila, Cebu, Hong Kong and Nogoya, and late in September the Maplecove will be joined by her sister ship Maplebell to offer a monthly service between these ports. Formerly the Beaverdell and Beavercove, these vessels were on regular C.P.S. Atlantic service before the change over. Lower right shows Maplecove's skipper, Captain R. A. Leicester of Vancouver, in the chartroom of his ship studying the route the vessel will sail while lower left shows a cargo sling with a load of Canadian produce bound for Yokohama, Japan being loaded on the ship at Montreal. All Canadian crews will staff the two ships.

# Egg Business Is Big Business In Canada

—\$100,000,000 Industry

(By H. L. Jones)

OTTAWA.—More than 20,000,000 Canadian hens are laying to the tune of some 400,000,000 dozen eggs a year. That adds up to around \$100,000,000 annual take for the egg side of the poultry industry.

The federal Bureau of Statistics has just come out with figures to show the hens weren't laying as well in June as they were in the previous month, but still better than they did in June, 1951. Average production per hen in June this year was 15.5 eggs compared with 17.4 eggs in May and 15.1 eggs in June last year.

The bureau didn't give the reason but the drop probably was due to increasing summer heat. Hens don't lay so well when it's hot. That probably explains too, why hens in the more moderate climates of British Columbia and the Maritime provinces have better production averages on the whole than in more extreme central Canada and the Prairies.

When temperatures go up and egg production goes down it hits the egg consumer in the pocket book. For instance, egg prices took a sharp drop around May, mainly because of a market glut, and sold at around 50 cents a dozen or less for grade A large in Eastern Canada.

With the onset of summer heat and consequent declining production, prices have climbed. Grade A large in most eastern centres now are retailing at about 75 cents a dozen.

Canadian hens on farms and in the little backyard hen runs produced an estimated 29,300,000 dozen in June this year, almost 7,000,000 less than the estimated May output of 36,200,000 dozen. The June, 1951, production figure was 26,400,000 dozen.

This brought total estimated egg production in Canada to 214,300,000 dozen for the first six months of this year, more than 36,000,000 dozen above the output of 178,000,000 dozen in the first half of last year.

During June producers sold for market 23,200,000 dozen, valued at \$8,700,000, compared with 28,500,000 dozen valued at \$9,400,000 in May.

Ontario is Canada's largest egg producer. In June Ontario had 7,610,000 hens which laid an estimated 10,564,000 dozen eggs during the

month, compared with 6,722,000 hens and 8,675,000 dozen eggs in June, 1951. Next biggest egg producer is Quebec which had 3,951,000 hens in June, laying a total of 5,231,000 dozen eggs.

But Nova Scotia got the best June production out of its 893,000 hens which laid 1,523,000 dozen eggs, an average of 1,719 eggs per 100 hens.

British Columbia was next with 1,466,000 hens laying 2,491,000 dozen eggs and averaging 1,712 eggs per 100 hens.

Egg men will tell you it's the climate.

## Sask. Breeders To Hold Sheep And Swine Show

REGINA.—Saskatchewan sheep and swine breeders will hold their annual fall show the week of Oct. 27, it was decided at directors' meetings of the Saskatchewan Sheep and Swine Breeders' associations at the Provincial exhibition.

There had been some doubt as to whether fall shows would be held but the meetings decided that they should get the sales and shows routine going again as soon as possible following the recent outbreak of foot-and-mouth disease.

## SELECTED

## Recipe

### SALMON SUZETTES

2 tablespoons butter or Blue Bonnet Margarine  
2 tablespoons flour  
1 cup milk  
1 cup once-sifted pastry flour or ¾ cup once-sifted all-purpose flour  
¼ teaspoon Magic Baking Powder  
Salt  
2 eggs, well beaten  
¾ cup milk  
½ pound can salmon, flaked  
2 tablespoons toasted chopped almonds  
1 tablespoon chopped green pepper, if available  
Pepper  
Few grains grated nutmeg  
1 egg yolk, slightly beaten  
1 teaspoon Worcestershire sauce  
Melt butter or margarine in top of double boiler and blend in the 2 tablespoons flour; slowly stir in the 1 cup milk. Cook, stirring constantly, until sauce is smoothly thickened. Cover and keep hot over boiling water.

Mix and sift once, then sift into a bowl, the 1 cup pastry flour or ¾ cup all-purpose flour, Magic Baking Powder and ¼ teaspoon salt.

Combine the 2 well-beaten eggs and the ¾ cup milk.

Make a well in the flour mixture and add liquids gradually; mix until smooth.

To the sauce, add salmon, almonds and green pepper, if being used. Season to taste with salt, pepper and nutmeg; heat thoroughly.

Stir a little of the hot mixture into the slightly-beaten egg yolk; return to double boiler and cook, stirring gently, until thickened. Stir in Worcestershire sauce.

Bake batter as very thin pancakes; spread with salmon mixture and roll up.

Serve immediately.  
Yield: 4 servings.

### IT'S THE ARMY WAY

INVERNESS, Miss.—Barber Houston Minyard had his youngest customer, a 28-day-old baby whose Army father wanted his son's hair cut. The baby's grandfather fed the infant with a bottle while Minyard clipped the hair.

## World's Greatest!

Australia's Marjorie Jackson speeded to a world record recently in winning the Olympic 100 metres dash at Helsinki. Here you see the Empire athlete getting away on one of her characteristic starts. Her time was 11.5 and she had the race well under control all the way.

## Started Canning In Kitchen Now Has Profitable Business

SUMMERLAND, B.C.—Mrs. David Lingstone Milne, 65, who started canning for charity on a little machine fastened to her kitchen table 18 years ago, now is owner of a profitable business in this Okanagan Valley centre.

During depression years she canned peaches and sent them to relatives on the prairies and to Summerland hospital.

Soon she was supplying canned peaches, pears, apricots, prunes, carrots, tomatoes and corn and orders came in from many parts of Canada.

To keep pace with the demand, her sons, employed in a packing plant, built her a factory in their spare time. In the first year of its operation, she paid off \$1,600 owing on her house and bought a refrigerator, an electric washer and a typewriter.

The next year the boys quit the packing house and went to work for their mother; so did Mr. Milne, a science teacher.

Word-of-mouth advertising worked wonders. Soon customers began arriving at the little building with boxes to be filled with Mrs. Milne's preserves and orders came from stores, too. The plant was extended and modernized and at the end of the 1951 packing season Mrs. Milne

said she felt she could call herself a success.

"It's a sort of miracle," she said. Mr. Milne died two years ago.

## Bake this tasty CHEESEBREAD easily, speedily with new Fast DRY Yeast!

● New bread and bun treats are a treat to make with the new form of Fleischmann's Yeast! Never a worry about yeast cakes that stale and lose strength... new Fleischmann's Dry Yeast keeps full strength and fast-acting right in your cupboard. Get a month's supply.

### CHEESEBREAD

● Scald 3 c. milk, ¾ c. granulated sugar, 1½ tbs. salt and 4 tbs. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ¾ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 mins., THEN stir well.

Stir in cooled milk mixture. Stir in 4 c. once-sifted bread flour; beat with a rotary beater until the batter is smooth. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Work in 2 c. lightly-packed finely-shredded old cheese and 5 c. (about) once-

sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and let rise until doubled in bulk. Punch down dough; turn out on lightly-floured board and divide into 4 equal portions. Cover lightly with a cloth and let rest for 15 mins. Divide each portion of dough into 3 parts; knead and shape into smooth balls. Place 3 balls in each of 4 greased loaf pans (4½" x 8½"). Grease tops and sprinkle each loaf with ¾ c. shredded cheese. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, 45-50 mins.

## Had Eczema For 40 Years

Itching Misery Spread Over Hands, Arms and Legs

Tells How He Found Relief

"I gave up all hope of ever finding a remedy that would give me a little relief. I tried everything," writes Mr. M. R. of Vancouver, B. C.

"I was compelled to leave a good job on account of the condition of my skin. I read about your Emerald Oil—bought a bottle and applied a few drops on my raw flesh. Eureka—what had I found! I wish you could see my skin today. I wish to heartily thank you."

If you or any relative or friend suffer from any form of itching skin troubles, you will make no mistake in giving MOONE'S EMERALD OIL a trial. Stainless—Greaseless—but extremely efficacious. MOONE'S EMERALD OIL is obtainable wherever drugs are sold.

### Reasons for Bow Ties

Do you go for bow ties, sir? If not, perhaps you should. It is said a bow tie makes a man look much younger. That a man who habitually wears such ties is usually young at heart. Last, but certainly not least, it is claimed a bow tie appeals to the maternal instinct in women. That when a woman sees a man wearing a bow tie she has an inclination to baby him. Among the very first things I can remember my father teaching me were how to lead with my left, shave with a straight razor and tie a bow tie.

Two Airmen  
Die In Plane  
On Busy Road

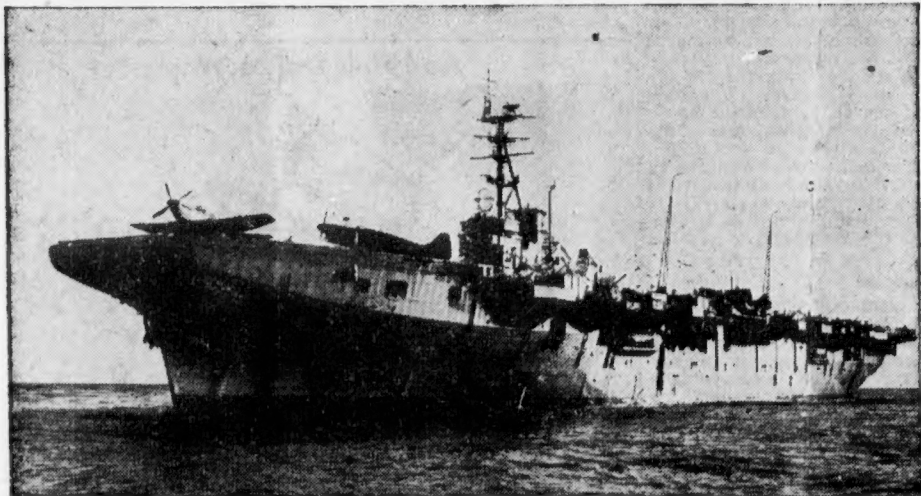

★ ★ ★ ★

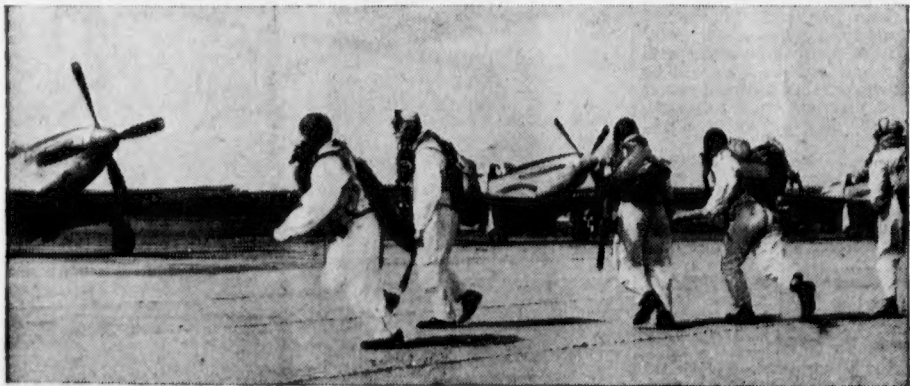

**FIFTY CANADIAN CO-EDS TAKE R.C.A.F. SUMMER COURSE**—At the R.C.A.F. station at London, Ont., 50 co-eds from four Canadian universities are taking a summer course which has them studying world affairs, air force law and other academic subjects, and acquaints them with R.C.A.F. equipment. Marksmanship is one of the favorite courses of the training and their instructors admit the students are pretty good. Left to right, Sylvia Novak, University of British Columbia; Sandy James, McGill, and Kay Stirret, Toronto. The summer course is a new venture for the R.C.A.F.—Central Press Canadian.

**TWO AIRMEN DIE AS FLAMES PREVENT RESCUE**—On a busy roadway at Malton, Ont., the framework of a Cessna airplane smoulders after it crashed and burned shortly after take-off. Two men, Cy. Fairhurst and Robert Tomlin, were killed. Observers said the plane appeared to have something hanging from the engine and the pilot had attempted to turn back to the airport to land when a gust of wind pushed the plane into hydro poles. Within seconds the plane was surrounded by people who could not penetrate the flames.—Central Press Canadian.

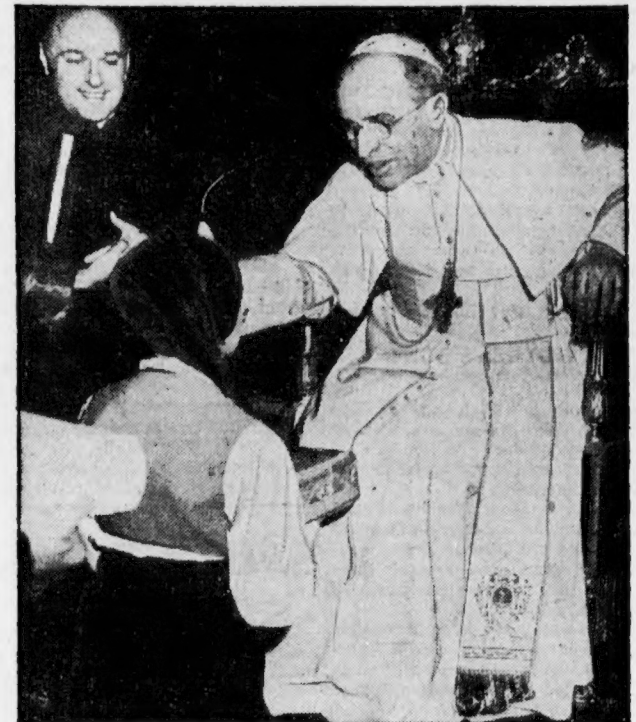

**HMCS, MAGNIFICENT DESPATCHED TO SUEZ CANAL**—Among the flotilla of Commonwealth ships detailed to the Suez canal is the Canadian aircraft carrier Magnificent. She was on courtesy call at Istanbul, Turkey, when ordered to speed to Egypt following the abdication of King Farouk. The 18,000-ton ship carries a complement of 1,100 officers and men.—Central Press Canadian.

**R.C.A.F.-U.S.A.F. EXERCISE ENDS WITH BOMBER ATTACK**—Ending Exercise Signpost, pilots of the R.C.A.F.'s City of London Auxiliary squadron stationed at Rockcliffe, Ottawa, scramble for their Mustang fighter planes to intercept a squadron of hostile bombers heading for hydro developments in the Laurentian mountains. The exercise was a training scheme jointly planned and controlled by the Air Defence Commands of the R.C.A.F. and U.S. Air Force and employed Lancaster bombers, jet planes and Mustangs and thousands of military and civil defence personnel.—Central Press Canadian.

**EVIDENCE OF EARTH'S POWER**—A native of Arvin, Calif., Jack Garren stands knee deep in one of the giant fissures left in the ground by the violent earthquake that struck the West Coast recently, taking a toll of eleven lives. Dr. Hugo Benioff, of the California Institute of Technology, reports that settling jolts from the quake are now tapering off.—Central Press Canadian.

**POPE GREETS 5,000 YOUNG VISITORS**—Pope Pius XII received some 5,000 children from eight to 10 years of age recently. The children—youngest members of the Italian Catholic Action society—met with the Pope in the throne hall of St. Peter's during a massed general audience. His Holiness chatted with the youngsters, who came dressed in regional costumes. In this photo the Pope touches the young face of a boy dressed in traditional Sardinian clothes.—Central Press Canadian.

**HANDLES BILLIONS**—George S. Cowie, newly appointed treasurer of the C.N.R., annually handles far more money than the average thousand men have any hope of seeing in their lifetime. In his care are Canada's biggest payroll—\$391,000,000—and company transactions that run to about a billion and a quarter a year. He estimates that in his life he's handled 17 or 18 billion. But he's a lot like other men—he says Mrs. Cowie handles the family budget.

## Good News for Hunters

## Western Provinces To Have Longer Duck Hunting Season

OTTAWA. — Good news for hunters and farmers in western Canada was contained in annual regulations fixing 1952 duck-hunting seasons for all provinces. Because of improved waterfowl conditions in western Canada, open seasons will be extended in Manitoba, Saskatchewan, Alberta and British Columbia. The bag limit will be increased in Saskatchewan.

For the first time, farmers will be allowed to obtain permits to scare ducks and other migratory birds damaging their crops. It has been proved that if waterfowl are scared away from fields at their first approach they will tend to leave these fields alone, but if they are allowed to settle and eat grain for a day or two it is almost impossible to scare them away.

In the central and eastern provinces and in the Northwest Territories the length of open seasons and the bag limits remain unchanged. Regulations covering the use of firearms in hunting waterfowl remain the same as last year.

Dates of the open seasons and the length of the seasons vary from province to province. The season will vary in length from 45 to 69 days. No season will open earlier than Sept. 1.

J. M. MacLennan of the Canadian Wildlife Service said the breeding population of waterfowl in Saskatchewan is larger this year than a year ago. Surveys indicated smaller increases in Manitoba, Alberta and British Columbia.

Mr. MacLennan said there is justification for lengthening the seasons in western Canada and increasing the bag limit in Saskatchewan.

Saskatchewan will have a 69-day open season compared with 59 last year. The daily bag limit will be increased to 10 from eight.

The Manitoba season will be extended to 58½ days from 51½; Alberta to 67 days from 60 and British Columbia to 66 days from 60.

The daily bag limit for ducks in Manitoba, Alberta and British Col-

umbia will remain at eight. In other provinces not more than seven ducks may be taken in one day. No more than five geese may be taken daily in any province.

The Northwest Territories will have a 45-day season, the shortest for any part of Canada but unchanged from last year. The Yukon, with 61 days, will have the same length of season as in 1951. Newfoundland will have 55 days and the Maritime Provinces, Quebec and Ontario 57 days.

All descriptions of zones and dates of seasons will be given wide publicity by posters and leaflets before the new regulations come into effect Sept. 1.

## ODDITIES In The News

A black Persian kitty, back arched and spitting, stood before 150 dogs recently at Bexley, Eng.—and nothing happened. The dogs, undergoing obedience training, didn't budge.

Elizabeth Hamblin, 7, of Memphis, Tenn., dropped a quarter in the church collection plate and, after a moment's hesitation, added a penny. "For taxes," she whispered.

Ordinarily, tulip trees bloom and then put out leaves but one owned by R. L. Miller of Memphis, Tenn., reversed the process this year. The leaves came before the blooms.

This is the case of the half-shaved customer. Paul P. O'Connell, barber, of East Hampton, Conn., had the man partially shaved when a brush fire broke out. O'Connell, the local fire marshal, left hurriedly for the fire.

## World Happenings Briefly Told

The Seventh Regular Session of the United Nations General Assembly will open at U.N. Headquarters on October 14, instead of September 16, it was announced.

An analysis of 1951 automobile accidents in Lincoln, Nebraska, did nothing to back up wise cracks about women drivers. It showed 7,403 men involved in traffic accidents, compared to 1,362 women.

Alex. Herd, 23, stole a kiss from a pretty blonde in a London park. Judge Sir Herbert Dunnico fined him 40 shillings and suggested next time he feels romantic he should be careful not to kiss a policewoman.

As an ambitious plan to train teachers, the government of East Pakistan will set up ten new institutes for a total of fourteen. It is expected that about 1,400 teachers will be trained each year, to be employed in the free primary schools.

An offer by the Hilton hotels group of the United States to buy London's swank Grosvenor House has been rejected. Directors said it would not be in the national interest to turn over the management to a United States organization.

Sir Harold Scott, London's police commissioner, has postponed his retirement until after the coronation next year. He had planned to leave Scotland Yard on his 65th birthday in December, but will stay on for what he considers the "biggest job yet".

## Attendance At Prince Albert Park Soars

PRINCE ALBERT, Sask.—Tourist attendance this year at Prince Albert National Park is expected to soar well above the 100,000 mark.

Attendance in July was 37,908 compared with 36,488 in July last year. B. I. M. Strong, park superintendent, reports.

So far this year 71,271 persons have visited the park, compared with 55,570 last year in the corresponding period. Last year's total attendance topped 84,000.

By JANE DALE

### A MOTHER'S SONG

Goodnight, God bless you!  
Wherever you be,  
Goodnight, God bless you!  
Until you come back to me.  
In His safe keeping  
I'm free from alarm;  
In His safe keeping  
You'll come to no harm.

When you were small children  
And prayers had been said;  
When clean and all cozy,  
Tucked safely in bed,  
I'd kiss each wee darling,  
Turn down the light too,  
Then call softly when leaving,  
"Goodnight, God bless you!"

Now you are all grown up;  
Away from your home—  
Prayers follow you closely  
Wherever you roam.  
I think of you always  
When each day is through.  
As night falls I say softly,  
"Goodnight, God bless you!"

## Push In The Face Probably Saved Woman's Life

WINNIPEG. — The onlookers thought he pushed her in the face just to be mean. But when they talked to her later they found out that he had probably saved her life. It happened this way. The young lady was crossing a street as a car was passing. The man beside the driver put his hand out the window and pushed her away — an act of rudeness, the onlookers thought.

But when they went over to sympathize, she said, "I wasn't watching where I was going. If he hadn't pushed me I'd have walked right into the side of the car."

One of the onlookers said the car carried Ontario license plates. When he phoned the Free Press he said: "When you see a bit of quick-thinking like that from a visitor to the city you would certainly like them to know it was appreciated."

### BOOST SHEEP FARMS

ST. JOHN'S, Nfld.—Efforts will be made to turn the Cape Shore area into an important sheep farming section this summer. There are already 2,176 sheep on farms in the district but officials say the area could handle 5,000 with little need for winter feeding.

### WAS A GERMAN

George I, king of England from 1714 to 1727, could neither speak or write the English language. He was a German. 2998

## FIRST AID

**First Aid is just what the two words imply, namely the earliest possible intelligent aid or help given to the victim of an accident or sudden illness. This aid is usually of a temporary nature only, to be given at once, at the scene of the accident or sudden illness and before a doctor is available to assume responsibility.**

### Injuries To The Head And Spine

The civilization of which we are a part, with modern methods of transport has brought with it an ever increasing number of victims with injuries to the head and spine. These injuries are widely dispersed and the First Aider must be familiar with the management of these injuries and methods of transportation if these victims are to reach a doctor in satisfactory condition. Lives may be needlessly lost if people not properly instructed assume responsibility for the first aid care and transportation of these victims.

#### INJURIES TO THE HEAD

##### I. Concussion

The sudden application of force to the head will produce a shaking up or vibration of the brain. This will vary in degree depending upon the severity of the blow and the nature of the object striking the head.

A small object, such as a hammer, may dispel its force in fracturing the skull and there may be little associated brain injury. A blow by an object such as a sandbag may not fracture the skull but may profoundly shake and damage the brain even to the extent of causing death to the victim.

Injury to the brain with loss or disturbance of consciousness is known as **concussion**. The depth and duration of the unconsciousness depend directly upon the severity of the concussion.

##### II. First Aid Principles

All victims who have sustained an injury to the head should be placed under the care of a doctor if they:

1. Have been or are dazed or unconscious
2. Have a scalp laceration or concussion
3. Have bleeding from the nose, mouth or ears.

A brief note should accompany them giving the following information to the doctor:

1. Whether or not unconsciousness was lost, and if not, the presence or absence of confusion.
2. If normal movement was present in the arms and legs.
3. If the pupils of the eyes were equal or unequal in size.

(a) **The Semi-Prone Position.** The single, most important first aid procedure for persons with a head injury is maintenance of unobstructed breathing. This is accomplished by immediately placing the victim in the semi-prone position. This position permits blood, vomitus and secretions to run out of the mouth and nose, and if the victim is unconscious, will prevent the jaw and tongue from falling back and obstructing breathing. For purposes of transportation, they must be placed on the stretcher in the semi-prone position.

(b) **Moving the Injured Victim.** A head injury may be accompanied by an injury to the spine. Any injured person who is deeply unconscious, or if conscious is complaining of pain in the neck or back should be treated as though the spine were fractured. Such victims should be moved by at least four people two of whom will apply traction to the head and feet to prevent absolutely any movement that flexes, (bends forward) or twists the spine. Even if four people are not available, **deeply unconscious victims must at once be placed in the semi-prone position** as there is great danger of suffocation from obstruction to breathing or the aspiration of blood or vomitus into the lungs.

##### (c) Scalp Injuries

1. **Lacerations.** These should always be treated by a doctor because of the danger of infection. The scalp is very vascular and bleeding may be profuse. This can always be controlled by placing a thick sterile or clean pad over the wound and applying a firm pressure bandage. Nothing more should be done and particularly no attempt should be made to clean the wound, and no antiseptic

should be applied by anyone but a doctor.

2. **Contusions.** These require no first aid measures, but as there may be an underlying depressed fracture of the skull, these victims should be referred to a doctor.

##### (d) Fractures of the Skull

These may or may not signify serious injury to the brain. They are more serious if:

- (1) The fracture enters the nasal sinuses or ear cavities.
- (2) The skull is driven in (depressed fracture).

1. **The fracture enters the nasal sinuses or ear cavities.** Such fractures are usually recognized by bleeding or the escape of clear, watery spinal fluid from the nose or ears, in the absence of local injury. These victims should always be seen by a doctor because of the danger of bacteria entering the cranial cavity and causing infection (i.e. meningitis). Packs or other material should not be placed in the nose or ear passages. If conscious, the victim should be warned not to blow his nose.

2. **The Skull is driven in.** These are known as depressed fractures and always underly a contusion or laceration of the scalp. They are treated by an operation. The only means of being sure of the presence of such a fracture is by x-ray or by inspection at the time the laceration is being treated by a doctor.

##### (e) Shock

Head injuries do not cause severe shock unless there has been excessive bleeding from a scalp laceration or there are other associated injuries. These victims, therefore, should be kept comfortable but not too warm. They should not be surrounded by hot water bottles or hot blankets unless they complain of being cold. Placing a blanket over them is advisable unless the weather is very warm, but the purpose is merely to maintain normal body temperature.

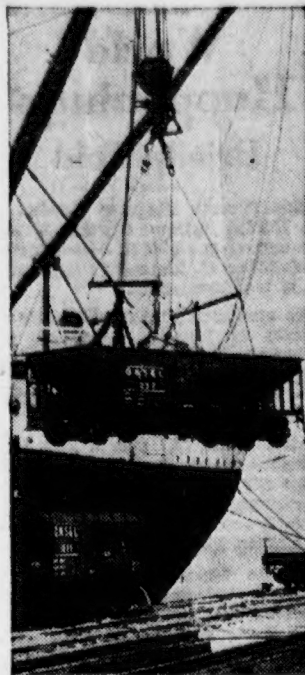

##### (f) Complications of Head Injury

Many persons who have sustained an injury to the head, rendering them dazed or unconscious, will promptly recover consciousness and insist upon going on their way. Such persons should be under medical supervision for a period of 24 hours. Some may refuse to accept this supervision, in which case it is imperative that a responsible person supervise and observe them for a period of 24 hours. Immediately following a head injury, there is no way of telling whether or not a clot will form between the skull and the relatively uninjured brain. This intra-cranial bleeding, if not treated by an operation will compress the brain and eventually kill the victim. Symptoms may develop within a few hours or over a period of days, depending upon the rate and amount of bleeding. A clot resulting from arterial haemorrhage, will usually produce symptoms within a period of a few hours, due to the rate of bleeding. Torn veins bleed more slowly. While only a small number of all head injuries develop intra-cranial clots, a large number of these will die during the night in jails, hotels, rooming houses, or even in bed at home. The only way to prevent these deaths is for a responsible person to visit the "patient" every hour for a 24 hour period and, if asleep, to awaken him. If no responsible person will assume this task the victim must be admitted to a hospital. The development of mental confusion leading to deepening unconsciousness is an emergency and demands the immediate attention of a doctor.

### Smile Of The Week

"Do you know anything about these lie detectors you hear so much about lately?"

"Do I know anything about them! Been married to one 20 years."

**ONE OF THE LARGEST LOADING OPERATIONS** ever seen along the Montreal waterfront recently took place at Laurier Pier where more than 60 railway cars are being placed aboard the British freighter John Lyras. The rolling stock is destined for the boom town of Seven Islands and the rapidly-expanding Quebec North Shore and Labrador Railway Co. The line is being hacked out through the wilderness of Ungava to the gigantic ore deposits hundreds of miles inland.

## Canada Now Has Radar Stations Operating In North

OTTAWA.—Canada has the first stations in her radar network operating now, their screens probing northern skies, and Americans will be coming into this country shortly to man stations of their own.

So far nothing approaching a network is in action and it will be months yet before the chain really is in operation in a big way. But there never will be anything like the vast screen across the far Arctic wastes that has so often been reported. This joint network will cover certain vital areas and will be much farther south than the Arctic circle.

Exercise Signpost, finished recently,

### This Tourist Not Worried Over Exchange

YARMOUTH, N.S. — Here's one United States tourist who doesn't worry about the money exchange problem.

Offering a \$20 bill here, she was told by the merchant: "There will be a small amount of exchange, lady." "Oh, that's all right," she replied gaily, "you just keep it."

"What could I do?" said the storekeeper later, "I exchanged her bill at par and felt good about it all day."

She owed the merchant 60 cents.

As many as 45 Ohio counties have at some time produced oil.

## New Bike And Wheelchair Make Boy And Crippled Sister Happy

COLUMBUS, Ga. — A 15-year-old boy wrote a story recently about "The Bicycle Thief".

"I am just a poor boy," said Newt Jones of nearby Phenix City, Ala., in a letter to the Columbus Ledger-Inquirer. "I work to go to school. Before school was out I would go to school in the morning and deliver groceries in the afternoon."

"I managed," he continued, "to

buy me a bicycle with some help from my father. You see there are seven in our family and I can't expect too much help."

"I have a little sister nine years old. She has never walked. She does not have a wheelchair so you see we have to carry her in our arms. "On Sundays I always ride her around on my wheel and the onliest time she gets to go to the show (which she is crazy about) is when I carry her on my bicycle."

"Well July 4th I carried her to the theatre and after the show we came out to go home and someone had stolen my wheel. I thought her heart would brake for she knows she won't get to go as much as she did. I hope that the one who got that wheel reads this and always remember that they did not steel a bicycle, but the onliest way a little cripple girl had to go about in the city."

A few hours after the letter was published, two heavy hearts were lightened by donations of a bike to Newt and a wheelchair to his sister. There were also other donations of money and offers of other bicycles.

### CERTAIN SANDWICHES MAY SPOIL PICNIC

The simple sandwich can prove a snare at a carefree picnic, the Health League of Canada warns in its Health magazine. It says non-acid, moist and mixed fillings of the salad type, such as those using fish, meat, chicken or eggs, are not recommended for hot weather carrying. Sandwiches made with jelly, peanut butter, non-perishable cheese, pickled tongue or with thuringer-type sausage have much better keeping qualities.

### Quick Canadian Quiz

1. Canadian manufacturers in 1951 made a profit of 27.1 cents, 17.3 cents, or 5.8 cents on each dollar of sales?
2. What are the two great inland waterways of the Northwest?
3. Between 1939 and 1952 taxes on corporations increased by how much?
4. An artist whose drawings illustrate many Canadian history texts, he died in 1951.
5. Abundance of what two resources have made Canada the world's leading newsprint producer?

## OUR COMPLETE SHORT STORY—

## Vacation With Love

By W. H. DAVIES

JOAN paused to brush away the tears and resumed packing. They'd been right when they said she might get hurt. But they'd also been wrong in saying she was foolish and extravagant. Until now it had been a glorious adventure. It had been worth every minute of the two years she had spent working and saving and planning. But now she was leaving. Not because her vacation was over but because her dream world had collapsed about her when Mark Stephens went out of her life.

When first she arrived at the exclusive resort it had been a little difficult to adjust herself. But her natural grace and poise won out.

It was at the pool that Mark had climbed out of the water and into her heart. She liked the casual way they had met. She had been sitting on the edge. He had tossed his head to clear the hair from his eyes. A cold spray had fallen across her shoulders. She had jumped and uttered a little cry.

"I'm sorry," he said. "It isn't really cold."

Joan smiled. "I haven't been in yet."

"I know," he said. As Joan wondered what he meant she saw his tall, lithe body move toward her. She covered her eyes with her hands and waited for the cold water to engulf her. But nothing happened and when she looked he was laughing.

"I couldn't do it," he said. "I couldn't bear the thought of seeing all that beautiful hair wet and stringy. Good thing you weren't wearing your cap."

"That was very considerate," she said, smiling.

They were constantly together af-

ter that . . . riding, swimming, walking. Mark was different somehow. There was something about his easy manner that made her feel she had known him for years. Yet he was quiet and reserved when they were together in public. He never talked about himself and he didn't ask questions. Joan was glad he didn't ask questions.

Nothing unusual had happened between them until the night before he left. They had had a wonderful time, and when it was over he had accompanied her to her door. Then he had taken her in his arms for the first time and kissed her. When he left he had pressed her hand.

"Good-night, Joan," he said, and left her.

Staring at the ceiling in the darkness, she had felt uneasy. But she remembered their date for lunch and went to sleep with a smile.

It was almost one that afternoon and Mark hadn't telephoned. She dressed and went down. The head waiter showed her to the table that she and Mark had pre-empted. There was a note for her.

"My dear Joan:

"Maybe I'm a coward but this seemed the easiest way for both of us. Forgive me for leaving without seeing you again. I didn't want to fall in love with you but I did. I know it wouldn't work out. Please try to understand.

Love, Mark."

Alone in her room, Joan yielded to tears.

Next day, everything she did seemed hollow without Mark.

On the train that evening she found herself re-reading his note. She guessed that he must have known about her from the beginning. He was probably just being kind. That would be like Mark.

Back at the city station, she waited in line as the string of cabs moved slowly picking up the passengers. The night air was damp and foggy. Now the doorman was lifting her bags into a cab and holding the door open. He relayed her address to the driver.

The cab whisked her home. As it pulled up in front of an unimpressive little apartment house the driver half turned his head toward her.

"Right?" he asked.

Joan stepped out. As the driver came around to help her she pressed a bill into his hand.

"I can manage," she said as she picked up the bags.

"Joan!"

She stopped.

"Joan! It's me . . . Mark."

Joan dropped her bags and ran into his arms.

"Mark . . . oh, Mark," she sobbed. "Why didn't you tell me?" he was saying. "I thought you were one of those wealthy debs. I was spending my vacation there because I thought it would be fun."

Now the tears were running down her face but she was half laughing as she clung to him.

MODERN FARMING—With prospects of a bumper crop across the prairies, scenes as pictured above will be numerous. With powerful lights attached to the machinery work will be continued throughout the night by many farmers.—Central Press Canadian.

## Funny and Otherwise

First Clerk: "I'd like to sell you a set of Encyclopaedia that I got as a gift. I've no use for them."

Second Clerk: "No sale. I know more than any encyclopaedia."

First Clerk: "I admit that. But I thought you'd get a thrill going through it and picking out all the errors."

"Mabel is going round telling lies about me."

"Don't worry now, dear. Wait till she starts telling the truth."

"Your husband says that when he is angry he always counts ten before he speaks," said one woman to another.

"Yes," answered the other, "I wish he'd stop it. Since he's had dyspepsia, home seems nothing but a class in arithmetic."

Teacher: "Johnny, why does cream rise to the top of the milk?" Johnny: "So the people can get at it."

The best way to get real enjoyment out of the garden is to put on a wide straw hat, dress in thin loose-fitting clothes, hold a trowel in one hand, a cool drink in the other, and tell the man where to dig.

"You are not opaque, are you?" sarcastically asked one man of another who was standing in front of him at the theatre.

"Faith, an' Oi'm not," replied the other. "It's O'Brien that Oi am."

The railway porter looked searchingly at the three girls waiting on the platform. "Aren't you the crooning trio who sang on the radio tonight?"

"That's right," one of them told him. "We were making our debut on the air."

"And where are you bound for now?"

"We're just off to the North of Scotland."

The porter sniffed. "H'm," he remarked, "I suppose that's as good a place to hide as any!"

Brown: "How many coats do you give a door?"

Painter: "Three."

Brown: "So if you gave it four, the fourth would be an over-coat."

Painter: "No, a waste-coat."

Caller: "Do you think your medicine will help my wife's indigestion?"

Chemist: "It will make her digest anything."

Caller: "Good. I've got some new excuses for coming home late."

## WESTERN BRIEFS

## Long Term Plan

REGINA.—The Saskatchewan education department has issued a new curriculum for elementary schools. The new guide is the start of a long-term plan to build a program of elementary education on a co-operative basis.

## Floating Immigration Station

VANCOUVER.—A floating customs and immigration inspection station is being built in Vancouver harbor on a wooden scow, 60 feet long and 24 feet wide. It will accommodate vessels that are too small to use the deepsea docks.

## Northern Vandals

CHURCHILL, Man.—Vandals sometime during the last year have mutilated historic writings and inscriptions dating from 1741 to late in the 18th century. In one case brown paint was daubed over the signature of Samuel Hearne, famous northern explorer.

## Saskatoon To Celebrate

SASKATOON.—City council has approved a recommendation that Sept. 17 be declared a civic holiday and named "Citizens' Day". It falls in the week designated for observance of Saskatoon's 70th anniversary.

## Calves Trapped, Drowned

DONALDA, Alta.—Two calves owned by Palmer Hagen were drowned in a shot hole dug by an oil survey crew some years ago. The hole undermined a strip of land so that when the calves ran over it recently they broke through the crust into 12 feet of water.

## Level Land

Mr. and Mrs. Emmanuel Schaber were visiting the Acme S.D. A. Church and friends on Aug. 31st.

Mr. Bert Forman of Lindsay, Ontario spent a few days in this district while travelling through to B.C.

sponsored by the following companies: Federal, Alberta Pacific, Pioneer, Canadian Consolidated, Paterson, McCabe, Parrish & Heimbecker, Inter-Ocean, Independent, Ellison Milling, Canada West and Quaker Oats.

### Growing Fall Rye

In Western Canada, Fall Rye is generally considered a poor cousin of our more important cereal crops—wheat, oats and barley. In recent years, however, the interest of farmers in growing fall rye as a cash grain crop has increased appreciably.

Although fall rye can be grown successfully on all types of soils, it is probably most suitable for the lighter lands in the drier areas of Western Canada. Like all other cereal crops the highest yields are obtained on fallow land. However, damage from winter-killing is much more likely to occur on fallow than on stubble land.

**Date of Seeding.** The highest yields of grain have been obtained by seeding fall rye between August 15 and September 15. Indications are that September 1 is the most favorable time for seeding on light soils. The date of seeding on stubble will depend upon moisture conditions. Unless there is sufficient moisture in the soil to support a fair growth in the early fall, seeding of rye should be delayed until near freeze-up.

**Rate of Seeding.** Extensive tests at the Experimental Station, Swift Current, indicate that the rate of seeding of fall rye should be from  $\frac{3}{4}$  to 1 bushel per acre. The rate of seeding on stubble is the same as for a crop on fallow. The best depth of seeding is from 2 to 3 inches. Very deep seeding or seeding in loose ground should be avoided, for it tends to increase the amount of damage from winter-killing. When seeding fall rye on stubble it is not necessary, nor generally advisable, to work the land previous to seeding. If any tillage operation is undertaken before seeding, machines should be used which will tend to leave all the stubble in an upright position. This will help to hold snow on the land and to control soil erosion.

Miss Ruth Sell of Calgary was visiting in the district over the weekend.

A number of Dorcas members were working on Saturday night on some wool for a quilt.

Miss Doreen Weish of Calgary spent the long weekend with her sister, Mrs. Alton Suelzle.

Weekend visitors in Calgary were Mr. and Mrs. Albert Huether, Mr. and Mrs. Ben Huether, Mr. and Mrs. A.L. Dick, Mr. and Mrs. Marvin Dick and Mr. and Mrs. Dan Saylor.

Dr. and Mrs. E.O. Reiswig and son of Seattle, Washington spent a few days visiting their parents. Mr. and Mrs. C.K. Reiswig of this district. Dr. Reiswig is practicing medical surgery and during the last war he was a Doctor with the U.S. Air Force all over Europe. His sister, Mrs. Alverta Bhrtus is also visiting with her parents.

Mr. Albert Tetz of Vernon, B.C. arrived in the district in the district on Sunday on Sunray night to spend a few weeks helping with the harvest at the farm of John Leiske. Mr. Tetz once lived in this district with his parents, Mr. and Mrs. Jacob Tetz. He has been working in the Vernon hospital for a number of years.

## Highway Accidents Climb

Pages of newspapers are peppered more than usually this season with stories of pileups of cars and trucks on highways. The most spectacular such multiple accident happened south of Toronto a few weeks ago, on the Queen Elizabeth Way. In a heavy flow of traffic, a foolish motorist stopped suddenly. The car following on his bumper, plowed into him, and so on down the line. By the time police had unscrambled the mess and started traffic moving normally again, a total of approximately \$30,000 damage had been caused to scores of vehicles.

This same mishap on a smaller scale occurs every day on Alberta highways. All too often these collisions result in a fatality or serious injury.

Such accidents are attributable directly to human carelessness, the most fruitful cause of all accidents. They could be eliminated were a few simple and fundamental common-sense rules to be followed by every driver. The first: never stop suddenly on a highway, and if possible never stop at all on the pavement, but pull off to the side before doing so. Because of the narrowness of the shoulders along our paved roads and their lack of gravel it is not always convenient to drive off the pavement before halting. The prevalence of this type of highway mishap suggests that the department of highways could well give more thought to widening the shoulders and graveling them.

ening the shoulders and graveling them.

Another wise precaution is for every driver to assume that the one ahead may stop suddenly. Tests have established that a car proceeding at 50 miles an hour travels 183 feet on dry pavement after the brakes have been applied before coming to a stop. At this high speed, the vehicle goes 53 feet before a vigilant driver senses the danger and applies the brakes. So in all, it travels 243 feet from the time the danger is sensed by a wide-awake driver until it has been halted. This distance is reduced considerably at 20 miles per hour, but even then it is 52 feet. Some books on driving hints suggest that there should be at least a car length for every ten miles of speed between vehicles. While that is a safer procedure than virtually touching the bumpers of the car ahead, even this distance should be stretched somewhat for complete safety.

Something to remember is that the visibility range is sharply reduced at night. The limit with the best of lights is about 150 feet. Since it takes 243 feet to stop a car at 50 miles an hour after danger has been realized, there always is the possibility that at this speed a car cannot be halted at night in time to avoid crashing into a slow moving or stationary object ahead, particularly if the lane for approaching traffic is filled. Hence, a wise motorist drives at a slower speed after dark.

Be Careful . . . the life you save may be your own!

Inserted in the interests of public safety by . . .
